DETAILED ACTION

Applicants request for withdrawal of the finality if the last office action of record has been fully considered and the finality is withdrawn.

The response filed **December 04, 2006** presents remarks and arguments to the office action mailed **November 17, 2006**. Examiner notes the inconsistency between the claims as filed on August 21, 2006 and the remarks to the extent that claims 1-10 and 63 have not been identified as cancelled on the claim sheet. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Status of claims

Claims 64-76 are pending, claims 72-76 are newly added.

Allowable Subject Matter

Claims 73-76 are allowed.

Claim Rejections - 35 USC § 112

Art Unit: 1614

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 64-71 and newly applied claim 72 are and remain rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The remarks made with respect to the retinoic acids, esters is unpersuasive, simple because these compounds when synthesized, not every synthetic acid, ester known to man and yet to be made will have the property of treating acne. The term is very broad.

As evidence by Heller et al, retinol has long been recognized in the treatment of variety of skin disease, however, it had serious toxic effect. The term is very broad for which there is no written description.

Claims 64-72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

Art Unit: 1614

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

To satisfy the written description requirement, applicant must convey with reasonable clarity to one skilled in the art, as of the filing date that application was in possession of the claimed invention. A lack of adequate written description issue also arises if the knowledge and level of skill in the art would not permit one skilled in the art to immediately envisage the product claimed from the disclosed process. See, e.g., *Fujikawa v. Wattanasin*, 93 F.3d 1559, 1571, 39 USPQ2d 1895, 1905 (Fed. Cir. 1996) (a "laundry list" disclosure of every possible moiety does not constitute a written description of every species in a genus because it would not "reasonably lead" those skilled in the art to any particular species); *In re Ruschig*, 379 F.2d 990, 995, 154 USPQ 118, 123 (CCPA 1967).

The claims recite terms such as **leguminosae, solanaceae, gramineae, cucurbitaceae and mixtures thereof** for which there is no written description.

For example leguminosae is a one of the largest family of plants with 18,000 species (see ref. International Legume Database and information enclosed).
